

INDUSTRIAL ROPE ACCESS SPECIALISTS

AT HEIGHT SERVICES (INSPECTION, MAINTENANCE & REPAIRS) AND TRAINING

WHAT IS INDUSTRIAL ROPE ACCESS?

Evolution Access Technologies is an Industrial Rope Access Service Provider formed with a vision to make working at height accessible and safer.

With safety as the main focus, rigorous standards have been developed and established to provide a **safe, quick, and cost-effective** way of solving the most challenging access problems.

We only mobilise experienced **IRATA Rope Access Technicians** for a wide range of trades and disciplines. Similarly, all our Rope Access Safety Equipment conforms to the relevant standards (i.e. EN, ANSI, etc.).

Our highly trained and experienced rope access technicians supervise every project for quality workmanship, ensuring the best access approach is utilised and adhering to globally benchmarked HSE standards. To guarantee quality and safety, we carry out job-specific risk assessments and method statements, implement a rescue plan for every foreseeable situation, handle site management, and liaise with relevant contractors.

We work closely with our clients, understanding their needs and goals. We then provide customised solutions to overcome any project's unique challenges and deliver each project to the highest level.

WHY EVOLUTION ACCESS?

As a member of the **Industrial Rope Access Trade Association (IRATA)**, we uphold our commitment to safety and efficiency through the following standards:

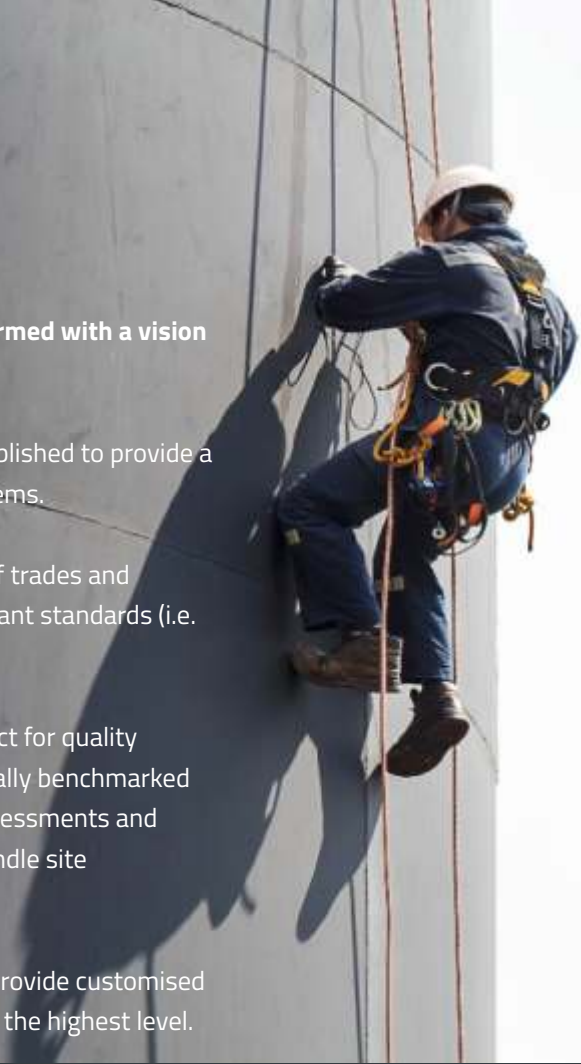

Highly Skilled Site Supervisors: All Site Supervisors are **IRATA Level 3** certified with over **3000 hours of logged** experience. They are proficient in planning and performing complex rope access manoeuvres, including hauling systems, rescue operations, equipment inspections, and project supervision.

Experienced Lead Technicians: Our Lead Technicians are certified to **IRATA Level 2** at minimum. They are skilled in executing complex rope access techniques, hauling systems, and rescue operations under the guidance of an **IRATA Level 3 Supervisor**.

Qualified Operators: All Operators hold **IRATA Level 1** certification. They carry out safe rope access techniques and equipment usage under the direct supervision of an **IRATA Level 3 Supervisor**.

Our Rope Access Services Provide Distinct Advantages:

- **Cost Efficiency** - Eliminates the need for costly equipment rentals and scaffolding installation.
- **Speed and Flexibility** - Quick setup and removal of Rope Access Systems boost productivity and reduce project costs.
- **Minimal Impact** - Equipment can be removed daily, eliminating unsightly access structures or scaffolding.
- **Minimal Disruption** - Reduces impact on pedestrians, occupants, and surrounding activities.
- **Structure Sensitive** - Ensures no damage to structures, preserving the integrity of valuable or historic buildings.

OUR SERVICES

INDUSTRIAL ROPE ACCESS

A. Inspection and Survey (Onshore & Offshore)

- NDT inspections (UT, MT, PT, ECI, TOFD, ACFM, LRUT, GUL)
- Derrick inspections
- Restricted access and confined space entry
- Lifting gears surveys and inspections
- Shutdown and turnaround inspection services
- Difficult access plant and piping inspections
- Restricted access and confined space entry
- Shipyard and offloading facilities
- Flare tip and flare line inspections
- Stack and chimney inspections

B. Maintenance and Repairs (Onshore & Offshore)

- Derrick's maintenance, repair, and assembly
- Flare tip to splash zone maintenance and repair
- Helideck remedial repairs
- Steel renewals and bolt tensioning
- Blasting & painting
- Welding and cutting
- Marine standard coating and sealant application
- Fabrication works
- Electrical installations
- Mechanical and engineering support
- Demolishing and decommissioning
- Piping composite repair systems

All our projects are meticulously planned and managed in full accordance with compliances and globally benchmarked HSE standards. Certified trade specialists carry out all tasks.

Welding and Cutting (Certified 6G, AWS, API, ABS), **Painting and Blasting** (Certified Coating Inspectors NACE/BGAS), **Non-Destructive Testing** (Certified ASNT/PCN UT, PT, MT, VT, ET), and **Fabric Maintenance** (Mechanical Technicians).

OUR CLIENTS

OTHER SERVICES

Consultancy and Training

- Work at Height
- Work at Height - Rescue
- Tower Crane Evacuation and Rescue
- Tower Climber and Rescue
- Rope Access Equipment and Rescue Equipment Supply
- Work at Height - Risk Assessment and Methodology
- Harness Awareness Working at Height
- Confined Space Entry
- Confined Space Entry - Rescue
- Rigging and Lifting
- Fire Evacuation Fire Awareness
- Ladder Awareness & Safe Use
- Height Safety - Consultation)
- Tree Top Canopy Management (Coffee Plantation)
- Aerial Rigging
- High Angle Adventure Course Building and Maintenance - Zipline
