WHAT IS PORTAMAT?

PORTAMat is a system of light-duty interconnected HDPE mats that can be quickly assembled by hand to form approach roads and platforms over unprepared grounds, desert & beach sand and grass turfs.

Use **PORTAMat** to access event venues with heavy equipment and vehicles during venue construction furthermore protect expensive grass turfs and indoor flooring during events.

BENEFITS

- Each mat supports vehicle weight up to 80 tons*
- Lightweight, easy-to-handle using the hand cut-outs
- Fast & easy to install using a choice of connector options
- Patented high-performance thermoplastic material
- Anti-corrosive, waterproof & chemical resistant properties
- Flexible, tough, durable, and eco-friendly

*Subjected to ground conditions.

WHY CHOOSE PORTAMAT?

REDUCED COST to build semi-permanent approach roads and platforms at event venues.

REDUCED RECURRING COST of purchasing plywood sheets for every event.

Install & remove, **QUICKLY AND EASILY** with simple connectors (no nails required).

REDUCED COST of damage to the local environment (damaged grass, external soil filling).

DUAL TRACTION SURFACE for light-weight vehicles & pedestrians.

PORTAMAT PROPERTIES

PORTAMAT APPLICATIONS

Overall Dimensions	2410 x 1200 x 12 mm
Useable Surface Area	2,89 m ²
Weight	36 kg
Colour	Black (standard)
Logistic	Standard high cube 40' container 500 mats, Truck standard EU 650 mats
Handling	Two persons can lift and handle the Mat easily using the hand cut-outs, No optical tools or equipment required
Recycling	100% recyclable
Safety	Nub structure prevents slips, trips, falls
Environmental	No liquid absorption & chemically inert. Easy to clean / decontaminate
Load Bearing Capacity	80 tonnes* per mat
Fire Rating	UL 94HB

* Load capacity is dependent on ground conditions
