Honeywell

GAS DETECTOR / PERSONAL PROTECTIVE EQUIPMENT / INSULATING MAT

- The Honeywell Insulating Mats provide a unique solution to protect workers against electric shock across substations, transformer rooms, LT and HT control panels, electrical switch rooms for AC and DC installations, battery rooms, and generator set rooms.
- Patented* dual-layer technology enables easy detection of damage on the top layer and helps users assess whether mats should be replaced.
- The Honeywell mats are proven to have a high dielectric strength – tested as per IS 15652: 2006.

TRAINING AND CERTIFICATION

The use of our products demands technical knowledge and competence. This is why we offer to take each user, or retailer, through a range of specialized workshops dedicated to our equipment and activities.

Our operators are thoroughly trained and undergo a comprehensive training program conducted by ASP which covers the prerequisites for product usage, basic techniques, safe usage methods for working at height, use of Personal Protective equipment, understanding legal obligations, and conducting periodic inspections of equipment.
